

Konstantin Alisov

01

Product Designer

Bilbao, Spain

Updated: Aug 2026

Product designer with 9+ years of experience designing enterprise software, complex workflows, and information-rich interfaces.

I transform ambiguous requirements into scalable products through systems thinking, strong UX foundations, and close collaboration with product and engineering. I use AI-assisted development to prototype ideas, better understand implementation, and collaborate more effectively with engineers.

Product Designer May 2025 — Aug 2026

Sole Product Designer for Platforma, an enterprise software ecosystem for immunology and bioinformatics. Owned product design across desktop applications, web services, design systems, technical documentation, and product communication, helping researchers navigate complex analytical workflows with confidence.

- Designed complex analytical workflows, including Data Mapping and sequence analysis, helping researchers navigate metadata compatibility, dense biological datasets, and advanced visualizations with greater clarity and confidence.
- Built a scalable design system with reusable components, interaction patterns, and implementation documentation, improving consistency and reducing one-off interface decisions across Platforma desktop applications and web services.
- Led the redesign of Platforma's public enterprise website, transforming a collection of products into a coherent enterprise platform story for customers and partners.
- Created technical documentation and product specifications that reduced ambiguity and strengthened collaboration between design, product, engineering, and marketing.

Product Designer Jul 2023 — May 2025

Owned product design from discovery through delivery, partnering with founders and product teams to define product direction, structure complex systems, and validate solutions before implementation.

- Led end-to-end product design from discovery through delivery, aligning business goals, user needs, and technical feasibility throughout the product lifecycle.
- Shaped product direction through close collaboration with founders, product managers, and engineers, enabling faster and better-informed product decisions.
- Designed information architecture for products with complex workflows and business logic, making sophisticated functionality easier to understand and navigate.
- Designed mobile financial product workflows involving blockchain transactions, AML verification, staking, and multi-account management, translating complex financial concepts into intuitive user experiences.
- Created prototypes and product documentation that aligned stakeholders earlier and accelerated product decisions before implementation.

UX/UI Designer Dec 2020— Jun 2023

Designed web and mobile interfaces across multiple industries, translating business requirements into usable, visually consistent products while building strong foundations in interaction design and UI systems.

- Designed responsive web and mobile interfaces across fintech, logistics, healthcare, and enterprise software, balancing usability with business and technical requirements.
- Designed user flows, wireframes, prototypes, and high-fidelity interfaces that transformed complex requirements into intuitive user experiences.
- Established reusable UI patterns and scalable design system foundations, improving consistency across digital products.
- Collaborated closely with product managers and developers throughout the product lifecycle, ensuring design decisions remained practical and feasible.
- Delivered user-centered solutions balancing business goals, technical constraints, and usability to support successful product delivery.

Freelance

UX/UI Designer Apr 2017 — Dec 2020

Independent design practice focused on websites and digital experiences for small businesses, combining UX thinking, information architecture, and visual design from concept through delivery.

- Delivered end-to-end website design, from discovery and information architecture to visual design and developer handoff, ensuring a smooth transition from concept to implementation.
- Designed responsive websites and digital experiences for businesses across hospitality, retail, and creative industries, helping clients establish clear and effective digital presences.
- Designed user flows, wireframes, prototypes, and high-fidelity interfaces that translated business goals into intuitive customer experiences.
- Partnered directly with founders and business owners to define goals and translate them into effective digital experiences.
- Managed independent client relationships from project scoping through delivery, ensuring clear communication and successful project execution.
