Konstantin Alisov

Senior Product Designer

Experience: **9+ years**
Products: **Web & mobile**
Areas: **B2B & B2C**
Location: **Bilbao, Spain**

I turn complex requirements into clear workflows and reusable interface patterns, working closely with product and engineering teams.

My work spans understanding user needs, interaction design, design systems, and implementation review.

Core expertise

Complex workflow design · Enterprise software · System thinking · Information architecture · Design systems · Cross-functional collaboration · Product discovery · Technical documentation

Experience

MiLaboratories

Product Designer
May 2025 — Aug 2026

Sole product designer for an enterprise scientific software ecosystem, responsible for desktop and web experiences, shared interface components, and the public product website.

- Designed analytical workspaces that let researchers compare complex data, configure visualizations, and adjust layouts and information density to suit different tasks.
- Used recordings of customer sessions and feedback from scientists to identify interaction problems, make compatibility rules visible earlier, and revise restrictions that limited valid choices.
- Built reusable components and documented their behavior across application views, dialogs, and sheets, supporting both internal engineers and developers using the SDK.
- Redesigned the product website's information architecture and built it in Framer, creating distinct paths for scientific and technical audiences. Collaborated with the CEO on content and technical accuracy, with engineering support for form integrations.

Alliance Professional Developers (APD)

Product Designer

Jul 2023 — May 2025

Owned end-to-end design across web and mobile products, including B2B platforms, CRM and internal tools, logistics, fintech, accommodation, and dating apps. Worked closely with founders, product managers, and engineers from problem definition through implementation.

- Helped shape product requirements and priorities by clarifying user needs, business goals, and technical constraints.
- Designed information architecture and end-to-end journeys for both professional and consumer users, translating complex requirements into clear interactions.
- Created and reviewed prototypes with stakeholders, then refined solutions using customer feedback and findings from implementation.
- Built reusable interface patterns and supported engineering through documentation, implementation reviews, and refinement of interaction details.

UX/UI Designer

Dec 2020— Jun 2023

Designed web and mobile interfaces across business software and consumer applications, adapting layouts and interactions to different audiences and product requirements.

- Translated business requirements into user flows, wireframes, interactive prototypes, and detailed interface designs.
- Established reusable UI patterns and component foundations for consistent experiences across screens and devices.
- Worked with product managers and developers to resolve interaction details and adapt designs to technical constraints.

Freelance

UX/UI Designer

Apr 2017 — Dec 2020

Designed websites and digital experiences for small businesses across hospitality, retail, and creative industries.

- Worked directly with business owners to define goals, organize content, and design responsive websites from initial structure through visual design.
- Managed project scope, client feedback, and developer handoff throughout delivery.
